Dear Parents,

The Seneca R-7 School District likes for parents to be very involved with their students' education. To further the goal of communication between parent and educator, the Seneca R-7 School District has set up the SIS module Parent-link web access. This module lets you, as a parent view certain components of your students' school information such as grades, fines, schedule, etc. We would like to make you aware that this is secure and that no one other than you will be able to view your student information. This is handled by a secure site and is password protected. Also, the e-mail you provide will not be given to anyone other than those school employees that require if for student information.

Once you have given an email address, signed, dated, and returned this form to one of the building offices, you will then be emailed with a login name and password to access the Parent-link website. If you have students in one or more buildings, please mark the respective building below. This form will take care of all students. A link on the school website, senecaschools.com has been provide to take you to the Parent-link login screen, as well as a link to the teacher directory where you can view assignments for classes.

Thank You for your participation.
